

PROTECTION PROFESSIONAL HANDGUN PROGRAM

PROGRAM OVERVIEW

Crossroads Training Academy regularly presents standard and customized programs in firearms use. We have presented these programs to members of private industry and the public sector.

The Protection Professional Handgun Program (PPHP) consists of 1½ days of intensive firearms training. The most difficult scenario possible for firearms deployment is during a protection assignment. No other situation imaginable is fraught with more split-second, shoot/don't shoot decision points and no other battleground can be more laden with bystanders of indeterminate intentions and hostility. During this program participants will learn the most effective tactics, techniques, and procedures for protection detail handgun deployment.

PERIODS OF INSTRUCTION

- Welcome
- Range Familiarization
- Safety Briefing
- Equipment Check
